- (54) Title: **FABRIC-FACED COMPOSITES AND METHODS FOR MAKING SAME**

- (57) Abstract: The present invention is directed to multiple layer composites (10) suitable for use as wall and floor coverings, among other uses, that provide a strong durable structure and a soft textile or fabric face. The composite includes a face layer (12) bonded to an adhesive layer (22) such that the adhesive layer (22) penetrates into the face layer (12). The face layer (12) can have legs (19, 34) extending there from, and such legs (19, 34) are anchored by the adhesive layer to provide stronger attachment between the adhesive layer and the face layer. A backing layer (26) may also be provided in contact with the adhesive layer (22) such that the adhesive layer also embeds into the backing layer (26), and the legs (19, 34) extending from the face layer may penetrate into the backing layer.

- *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii)) for all designations*
- *of inventorship (Rule 4.17(iv)) for US only*

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
